

**Assignment – 20 Changing
Values through Views.**

1) Which of these views are updateable (will allow DML operations)?

- #1 Create View Dailyorders
 as Select Distinct cnum, snum, onum, odate from Orders;
 ➔ **ans: yes**
- #2 Create View Custotals
 as Select cname, Sum (amt) Sum_Amt from Orders, Customers
 where Orders.cnum=Customers.cnum
 Group by cname;

 ➔ **ans : Views are not updateable which
 consists of join.**
- #3 Create view Thirdorders
 as Select * from Dailyorders where odate='1990-10-03';
 ➔ **not updateable due to distinct keyword in
 dailyorders;**
- #4 Create view Nullcities
 as Select snum, sname, city
 from Salespeople
 where city is NULL
 OR sname BETWEEN 'A' and 'MZ';
 ➔ **ans: yes**

**Updateable → based on a single base table (Salespeople), no
aggregates, no DISTINCT.
Filtering with WHERE is fine.**

2) Create a view of the Salespeople table called Commissions. This view will include only the snum and comm fields. Through this view, someone could enter or change commissions, but only to values between .10 and .20.

**CREATE VIEW commission AS
SELECT snum,
comm**

**FROM salespeople
WHERE comm BETWEEN .10 AND .20;**

```
D3_92819_Shubham>CREATE VIEW commission AS
-> SELECT snum,
-> comm
-> FROM salespeople
-> WHERE comm BETWEEN .10 AND .20;
Query OK, 0 rows affected (0.01 sec)

D3_92819_Shubham>
```

- 3) Some SQL implementations have a built-in constant representing the current date, sometimes called “CURDATE” or “SYSDATE”. The word SYSDATE can therefore be used in a SQL statement, and be replaced by the current date when the value is accessed by commands such as Select or Insert. We will use a view of the Orders table called Entryorders to insert rows into the Orders table. Create the Orders table, so that SYSDATE is automatically inserted for odate if no value is given. Then create the Entryorders view so that no values can be given.

```
CREATE VIEW Entryorders AS
SELECT Onum, Amt, Cnum, Snum
FROM Orders;
INSERT INTO Entryorders (Onum, Amt, Cnum, Snum)
VALUES (4001, 2500.00, 2001, 1001);
```

```
D3_92819_Shubham>CREATE VIEW Entryorders AS
```

```
-> SELECT Onum, Amt, Cnum, Snum
```

```
-> FROM Orders;
```

```
Query OK, 0 rows affected (0.01 sec)
```

```
D3_92819_Shubham>INSERT INTO Entryorders (Onum, Amt, Cnum, Snum)
```

```
-> VALUES (4001, 2500.00, 2001, 1001);
```

```
Query OK, 1 row affected (0.01 sec)
```

```
D3_92819_Shubham>
```
